ADVANTAGES OF BLENDED CEMENT

Blended cement has a smoother texture than compared to OPC and the fly ash and slag yield better compressive strength comparatively after the curing time is complete.

PORTLAND SLAG CEMENT (PSC)

It is special blended cement with low heat of hydration. The by-product from a blast furnace. i.e. slag is used in the manufacturing of PSC. It is less expensive as compared to OPC. PSC has less heat of hydration as compared to OPC.
